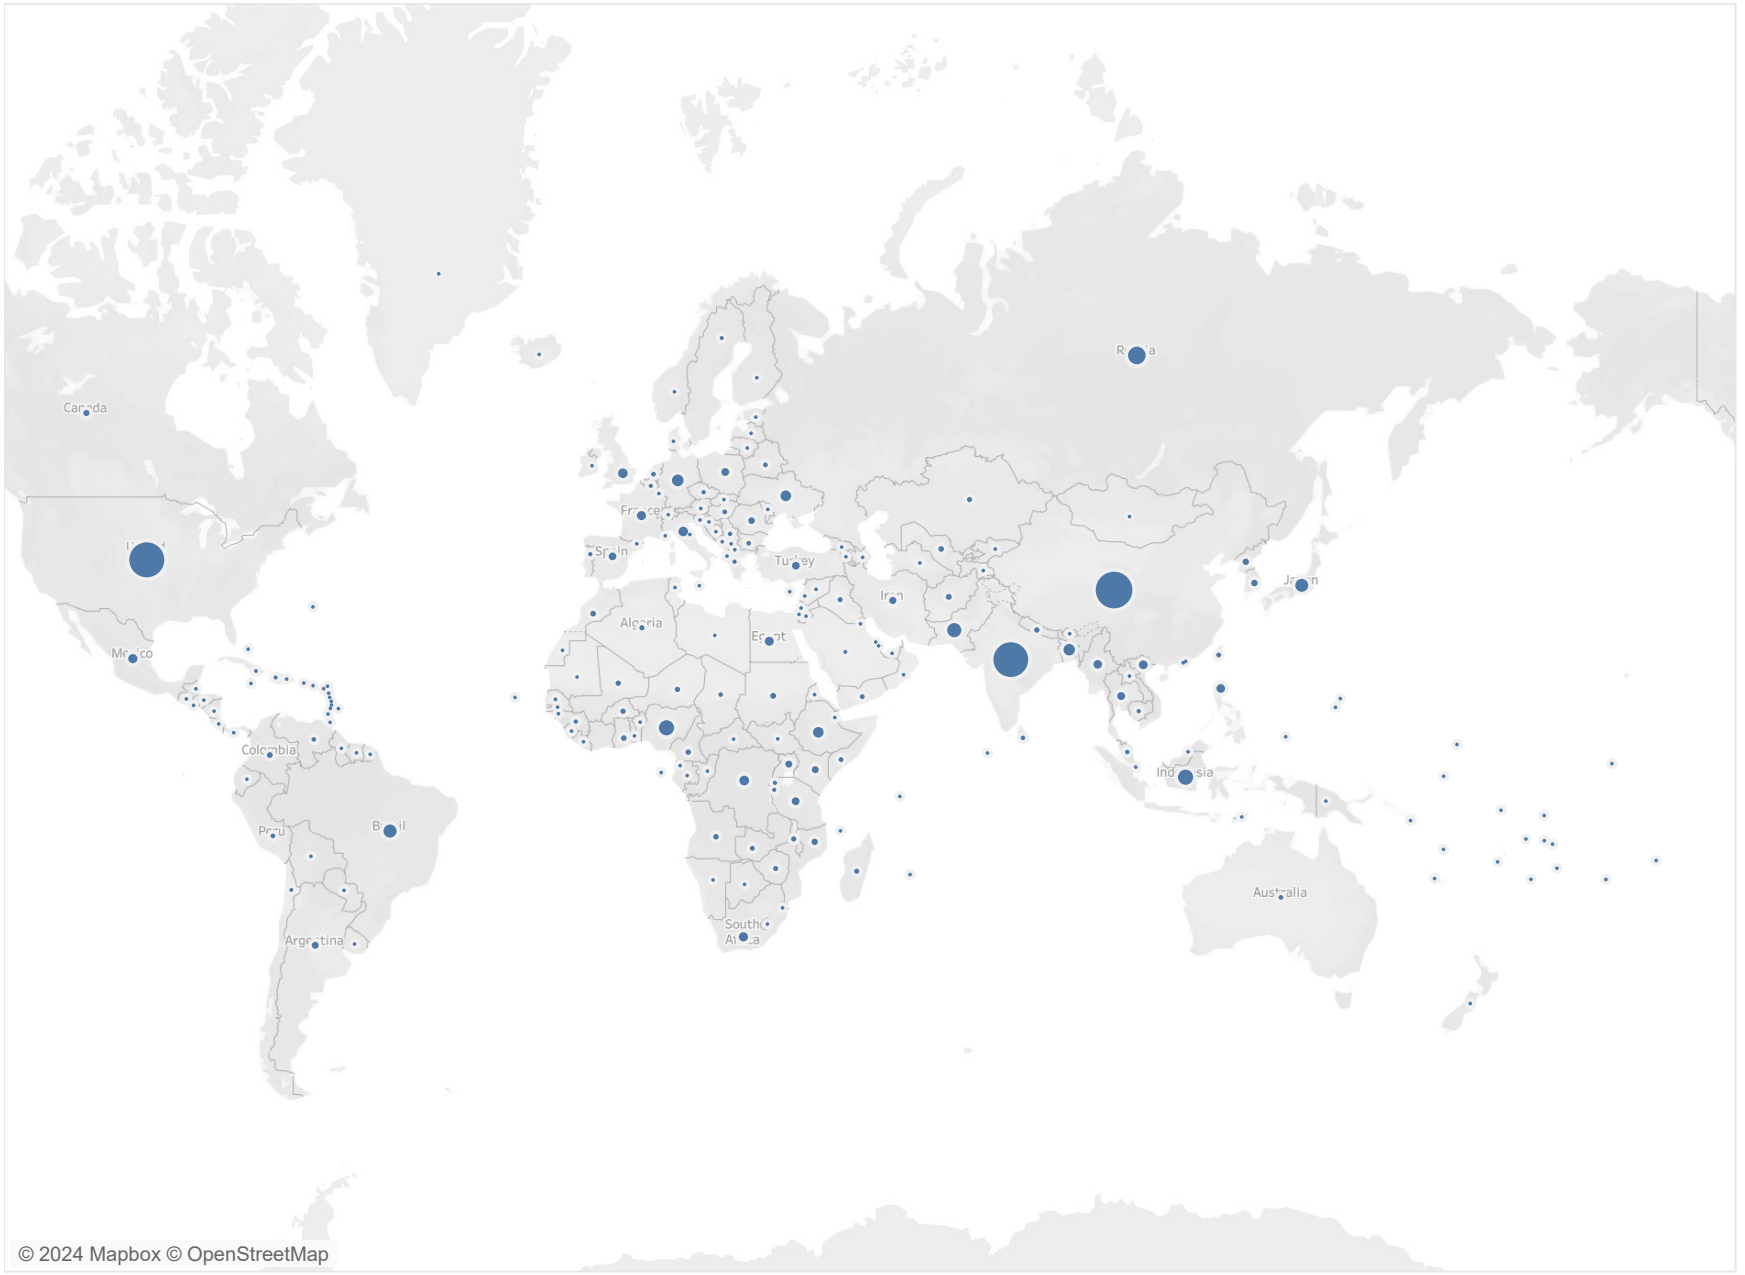
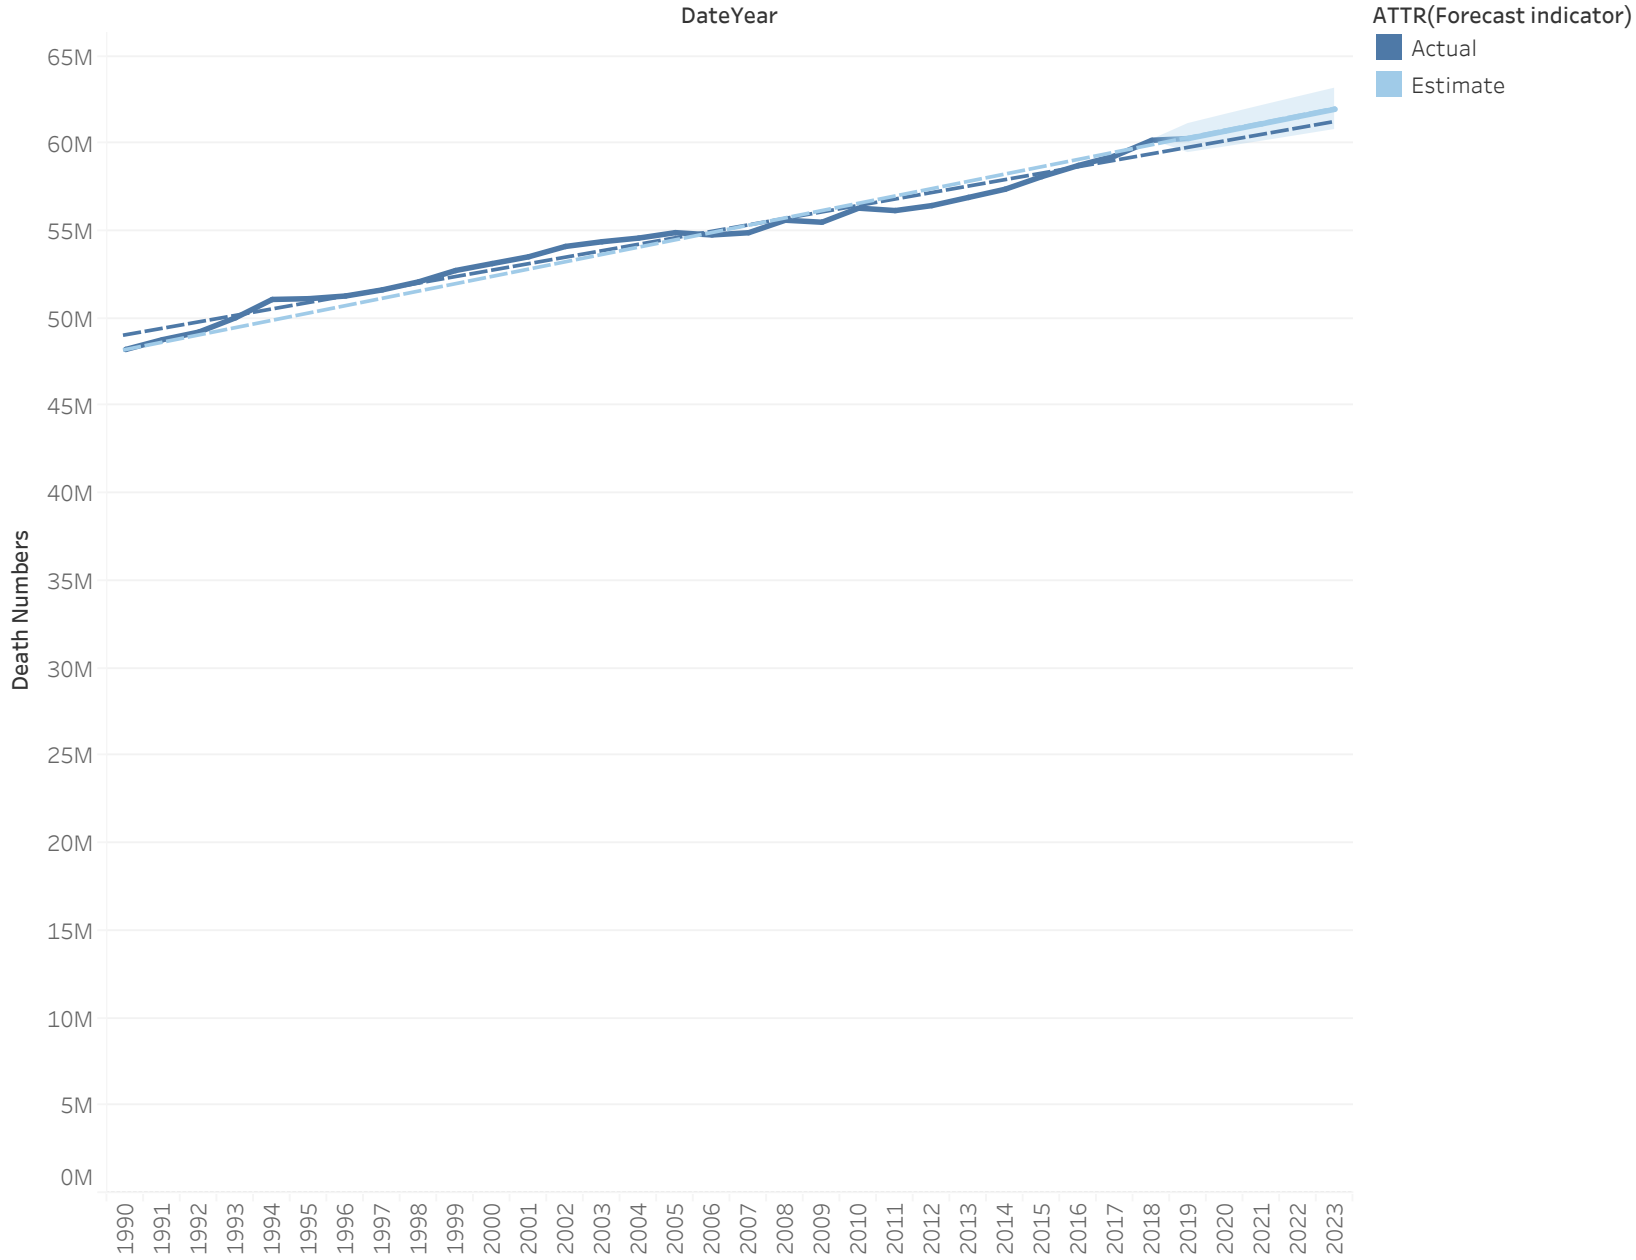
Death Data - High Level Analysis



Map based on Longitude (generated) and Latitude (generated). Size shows sum of Death Numbers. Details are shown for Entity.

By Year



The trend of sum of Death Numbers (actual & forecast) for DateYear Year. Color shows details about ATTR(Forecast indicator).

By Year and Country

Year of DateYear

Death Numbers

0 10,442,561

Sum of Death Numbers broken down by DateYear Year vs. Entity. Color shows sum of Death Numbers. The marks are labeled by sum of Death Numbers. The data is filtered on DateYear Year and Action (Entity). The DateYear Year filter keeps 30 of 30 members. The Action (Entity) filter keeps 213 members.

By Year and Country

Death Numbers

Sum of Death Numbers broken down by DateYear Year vs. Entity. Color shows sum of Death Numbers. The marks are labeled by sum of Death Numbers. The data is filtered on DateYear Year and Action (Entity). The DateYear Year filter keeps 30 of 30 members. The Action (Entity) filter keeps 213 members.

By Year and Country

Year of DateYear

Death Numbers

0 10,442,561

Sum of Death Numbers broken down by DateYear Year vs. Entity. Color shows sum of Death Numbers. The marks are labeled by sum of Death Numbers. The data is filtered on DateYear Year and Action (Entity). The DateYear Year filter keeps 30 of 30 members. The Action (Entity) filter keeps 213 members.

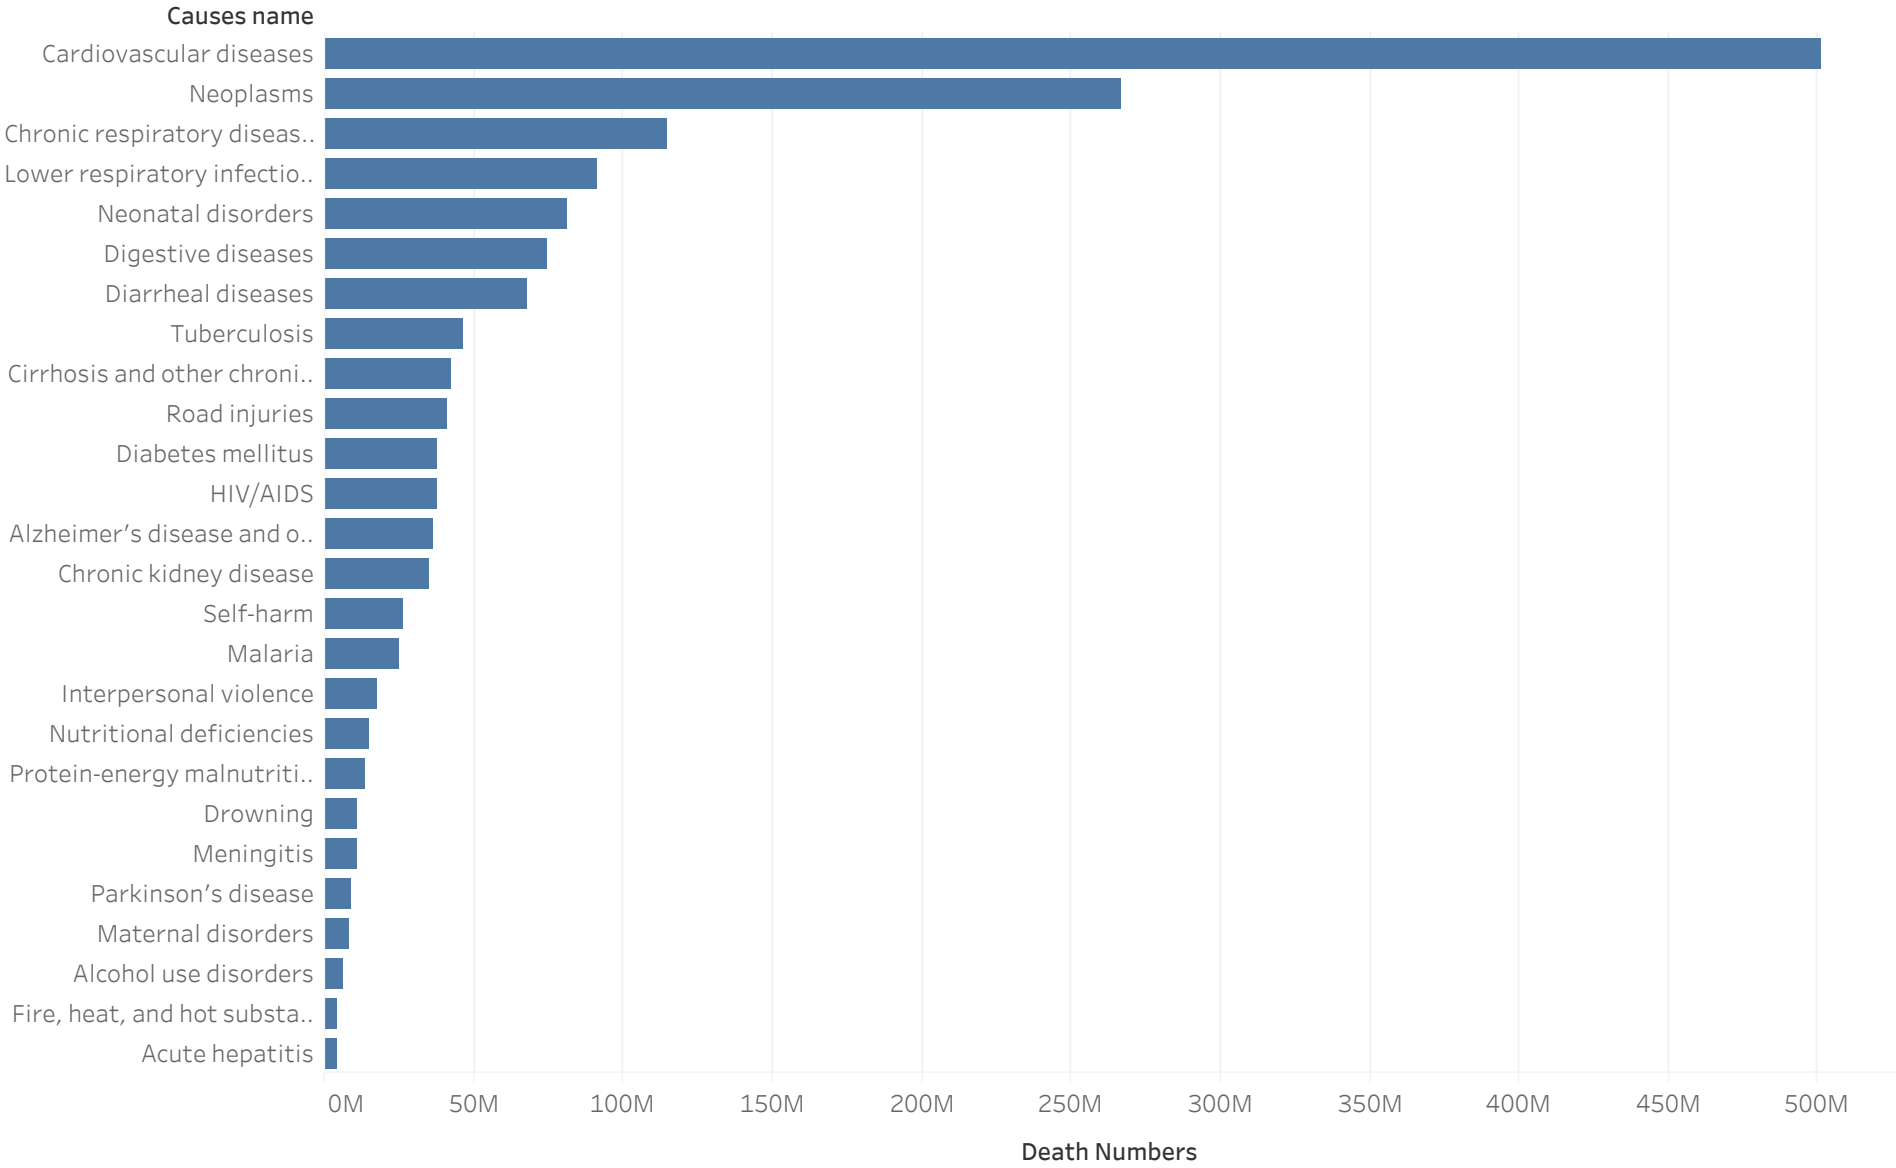
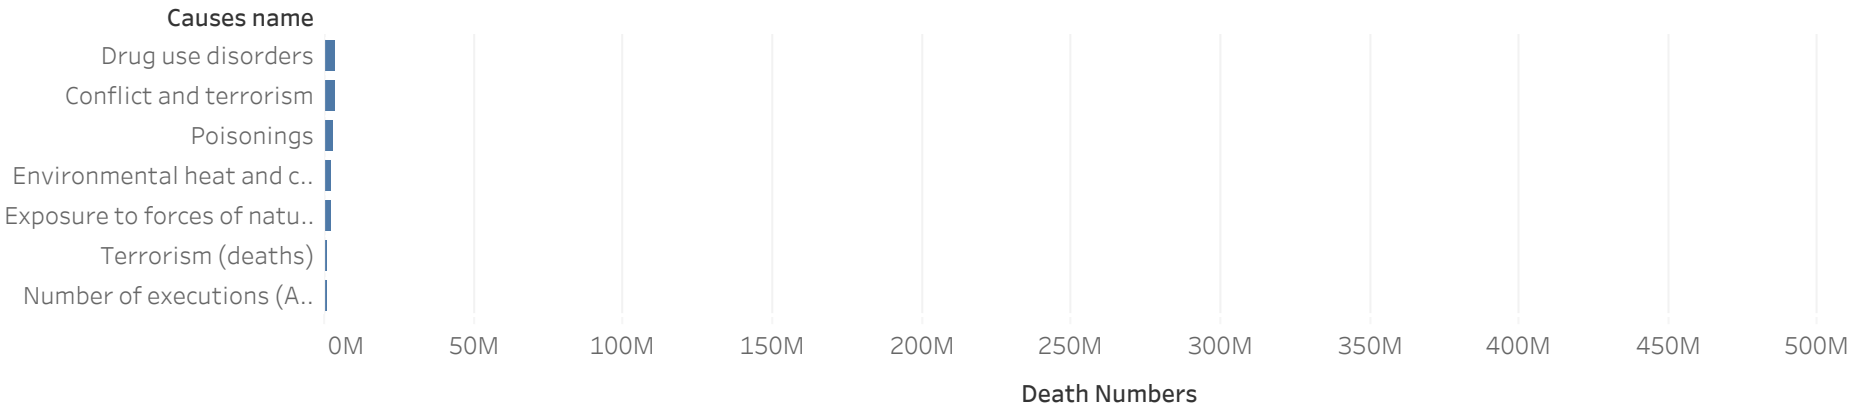
By cause



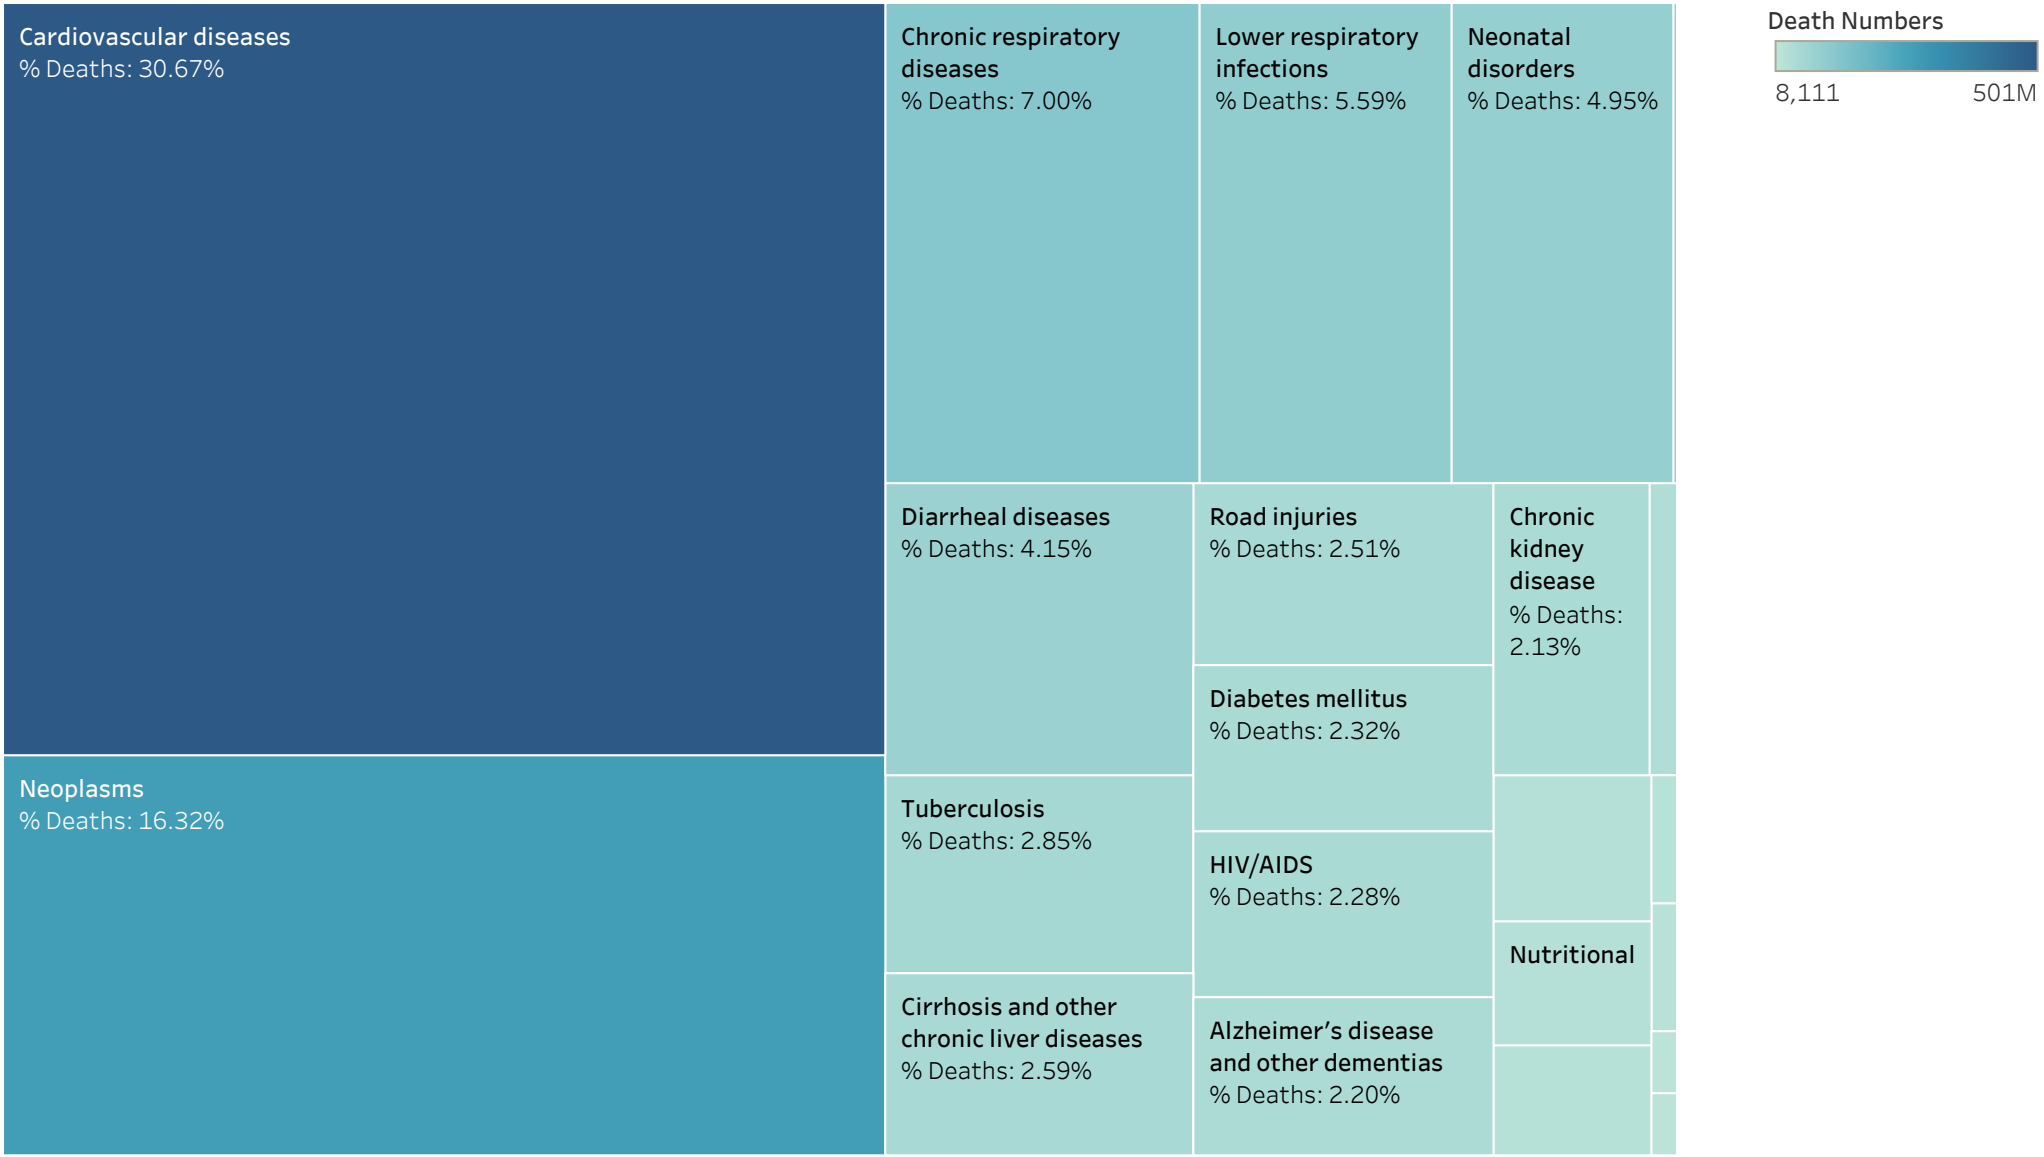
Sum of Death Numbers for each Causes name. The data is filtered on Entity and DateYear Year. The Entity filter keeps 213 of 213 members. The DateYear Year filter keeps 30 of 30 members.

By cause



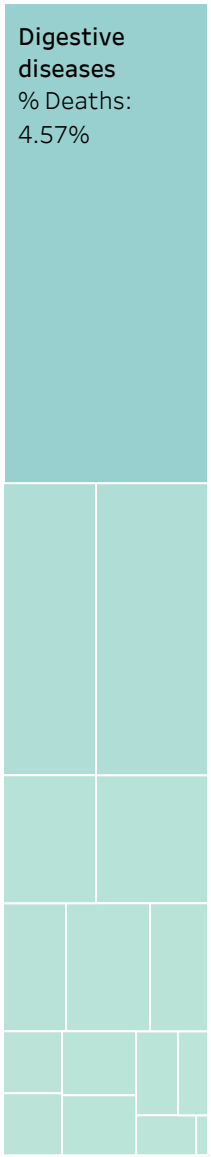
Sum of Death Numbers for each Causes name. The data is filtered on Entity and DateYear Year. The Entity filter keeps 213 of 213 members. The DateYear Year filter keeps 30 of 30 members.

By cause



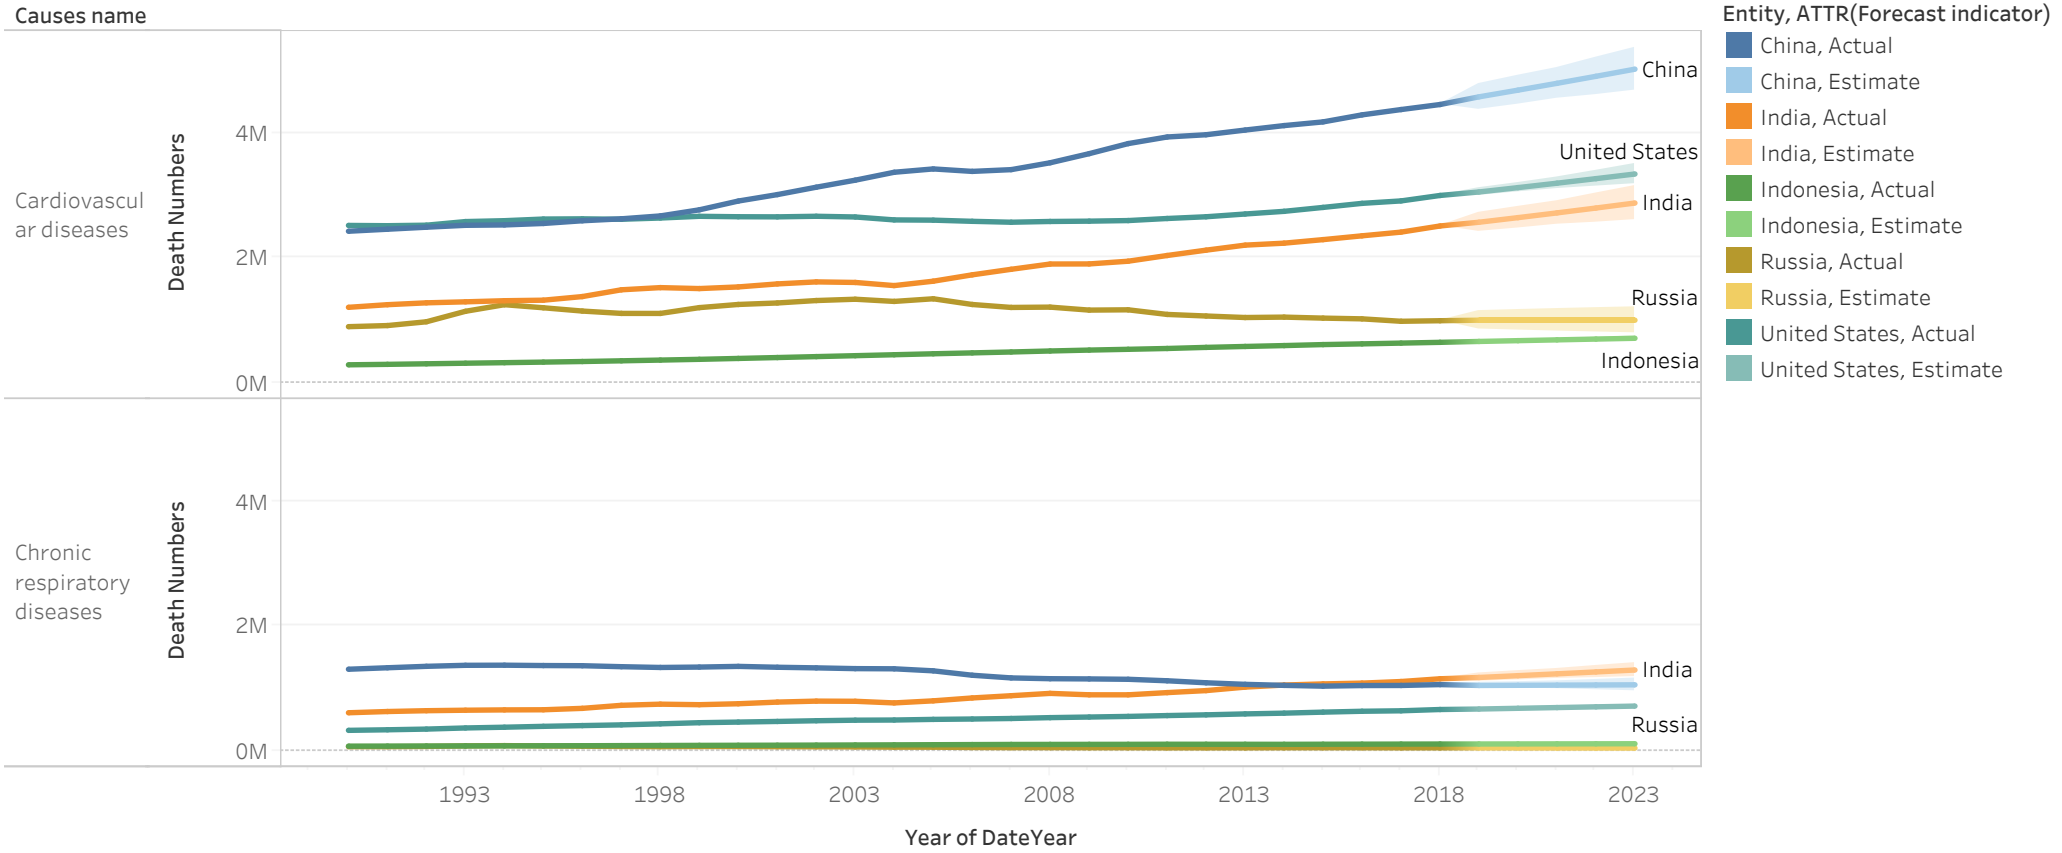
Causes name and % of Total Death Numbers. Color shows sum of Death Numbers. Size shows sum of Death Numbers. The marks are labeled by Causes name and % of Total Death Numbers. The data is filtered on Entity and DateYear Year. The Entity filter keeps 213 of 213 members. The DateYear Year filter keeps 30 of 30 members.

By cause



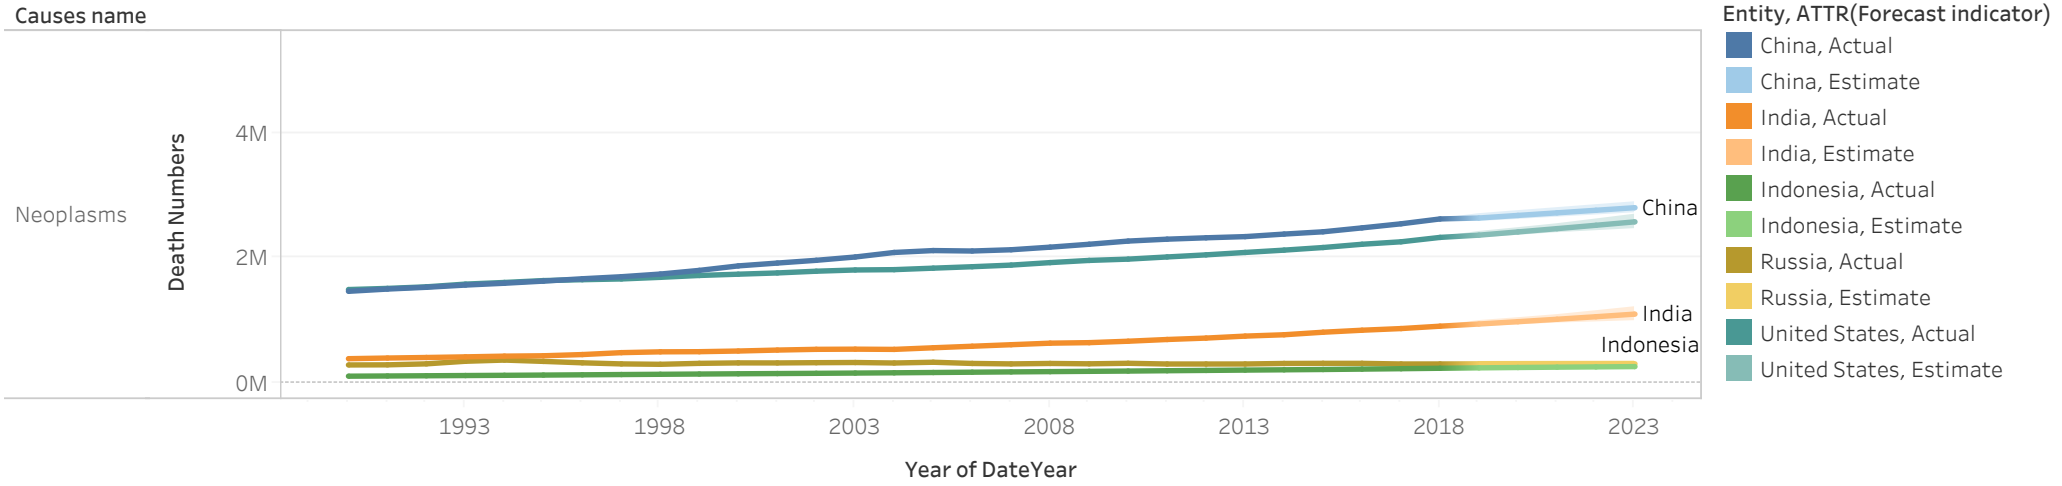
Causes name and % of Total Death Numbers. Color shows sum of Death Numbers. Size shows sum of Death Numbers. The marks are labeled by Causes name and % of Total Death Numbers. The data is filtered on Entity and DateYear Year. The Entity filter keeps 213 of 213 members. The DateYear Year filter keeps 30 of 30 members.

Death count - Top 3 cause/country/year



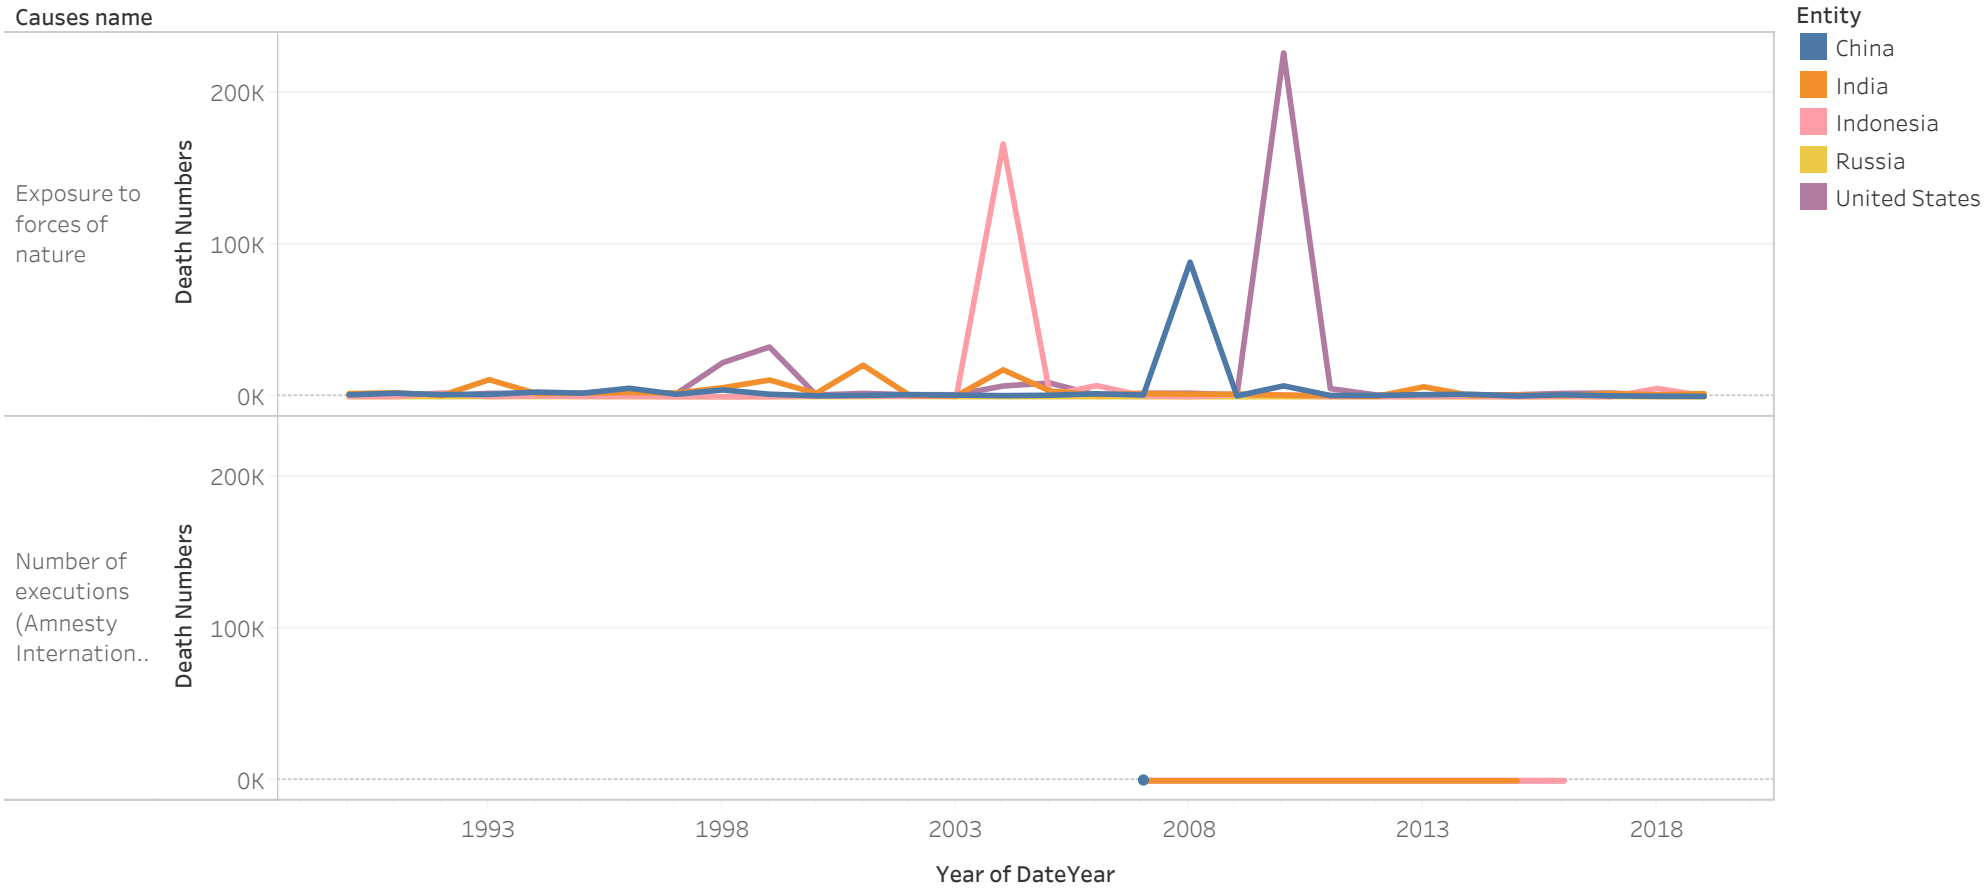
The trend of sum of Death Numbers (actual & forecast) for DateYear Year broken down by Causes name. Color shows details about Entity and ATTR(Forecast indicator). The marks are labeled by Entity. The view is filtered on Entity and Causes name. The Entity filter keeps China, India, Indonesia, Russia and United States. The Causes name filter keeps Cardiovascular diseases, Chronic respiratory diseases and Neoplasms.

Death count - Top 3 cause/country/year



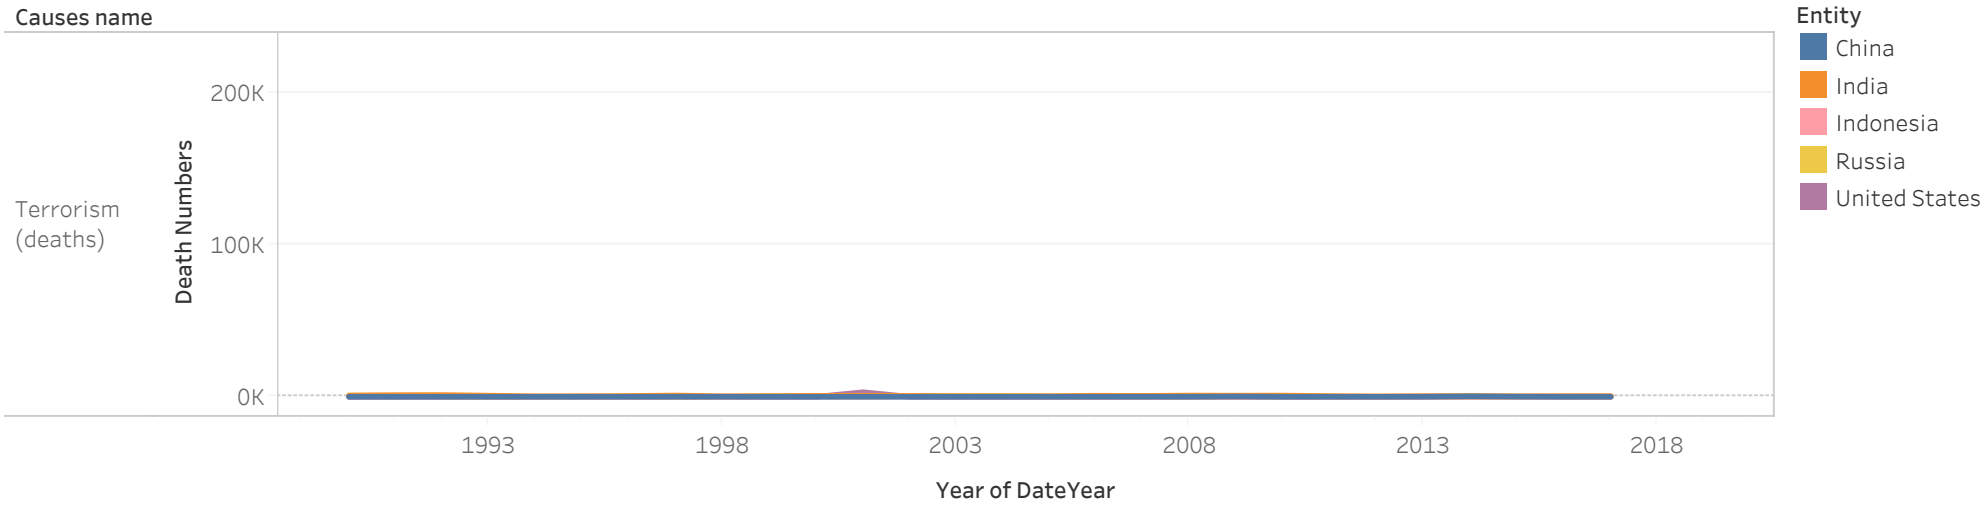
The trend of sum of Death Numbers (actual & forecast) for DateYear Year broken down by Causes name. Color shows details about Entity and ATTR(Forecast indicator). The marks are labeled by Entity. The view is filtered on Entity and Causes name. The Entity filter keeps China, India, Indonesia, Russia and United States. The Causes name filter keeps Cardiovascular diseases, Chronic respiratory diseases and Neoplasms.

Death count - Bottom 3 causes/country/year



The trend of sum of Death Numbers for DateYear Year broken down by Causes name. Color shows details about Entity. The view is filtered on Entity, Causes name and sum of Death Numbers. The Entity filter keeps China, India, Indonesia, Russia and United States. The Causes name filter keeps Exposure to forces of nature, Number of executions (Amnesty International) and Terrorism (deaths). The sum of Death Numbers filter keeps non-Null values only.

Death count - Bottom 3 causes/country/year



The trend of sum of Death Numbers for DateYear Year broken down by Causes name. Color shows details about Entity. The view is filtered on Entity, Causes name and sum of Death Numbers. The Entity filter keeps China, India, Indonesia, Russia and United States. The Causes name filter keeps Exposure to forces of nature, Number of executions (Amnesty International) and Terrorism (deaths). The sum of Death Numbers filter keeps non-Null values only.

Death clusters

Clusters and Entity. Color shows details about Clusters. Size shows sum of Death Numbers. The marks are labeled by Clusters and Entity.

Death causes - A study of trends

China has been able to fare better in terms of controlling chronic respiratory diseases however it continues to rise in others.

Cardiovascular deaths continue to rise steadily in all of the countries with highest deaths except Russia where a downward trend is noticed.

Inferences

Main causes of death:

With the main causes of death identified, it gives insights on where the government should promote funding to improve awareness. Following action items could be considered.

1. With cardiovascular diseases being the top reason for deaths, governments should increase marketing techniques to promote the importance of balanced diet and exercise.

2. With rising rate of Neoplasms which ultimately result in cancer, the public needs to be made aware of environmental and behavioral factors that could contribute to this sort of illness. The importance of periodic checkups to be also made known to the people.

3. Chronic respiratory diseases are often an outcome of smoking or substance use. There needs to be ample amount of education provided to youth and teens at a very early stage in life regarding the consequences of these behavioral patterns. Passive smoking is another reason where people find themselves vulnerable to. Educating general public on this is equally important.

Least causes of death:

An analysis of the least common causes of death indicate that government funding spent on causes such as natural causes, execution or terrorism would be inappropriate.
